H. Miguélez is professor at the Department of Mechanical Engineering in University Carlos III of Madrid (since 2012). She is Aeronautical Engineer (UPM 1994) and PhD in Industrial Engineering (UC3M 1998), with 29 years of research and academic experience in advanced manufacturing technologies.

H. Miguélez has led the research Group in Manufacturing Technologies and Mechanical Design since the origin of the team in 2005. She has led 11 competitive research projects (7 national, 3 regional CAM, 1 international H2020). She has collaborated in several contracts with industry leading 4 industrial projects.

H. Miguélez has published about 80 articles in journals included in JCR in collaboration with national and international researchers. Most works have been focused in manufacturing technologies, including advanced machining and numerical modelling of cutting. Recently new research lines have been developed focused on biomechanical and design and testing of protections.

She has directed 10 PhD works, and is currently directing 3 more.

Main objective of the team led by H. Miguélez is the research in advanced manufacturing processes in coordination with other related topics such as the design and manufacture of personal protections and biomedical components.
